PROFESSIONAL PROFILE

Software developer and IT professional with a BSc in Information Technology and experience spanning software delivery, ICT support, networks, and database systems since 2018. Founder of Havana Technologies Company Limited, coordinating client requirements, implementation, procurement, and quality assurance. Background across healthcare, education, humanitarian, and enterprise settings, with a focus on practical solutions, dependable support, and clear technical documentation.

TECHNICAL & SERVICE CAPABILITIES

Software & databases: PHP, MySQL, SQL, relational data modelling, REST-style APIs, authentication, access controls; Laravel, Sanctum and Blade in SignBridge.

Systems & networks: Workstation and server support, network connectivity troubleshooting, VPN and remote-access concepts, uptime monitoring and issue escalation.

User support & administration: Second- and third-tier troubleshooting, ticket documentation, mobile-device setup, account provisioning, end-user training, Microsoft Office 365 and Windows administration and deployment.

Security & data integrity: Access-control implementation, input validation, data integrity, and confidential handling of patient and beneficiary records.

Consulting & delivery: Requirements gathering, workflow analysis, solution specifications, procurement coordination, quality assurance, documentation and stakeholder communication.

Tools: Git/GitHub, XAMPP, Postman/API testing, Microsoft Office Suite, KoboToolbox, R and SPSS.

CURRENT EXPERIENCE

Backend Software Engineer

International Scholars Program | Meru, Kenya | Nov 2025 - Present

- Develop and support PHP/MySQL backend functionality and database-driven workflows for internal and client-facing processes.
- Support API integrations, authentication, access controls, and structured error handling and logging.
- Analyse operational requirements, document solutions, and collaborate with users to resolve application and database issues.

Founder & Lead Software Solutions Consultant

Havana Technologies Company Limited | Kenya | 2022 - Present

- Gather client requirements, assess technical needs, define solution specifications, and coordinate software and database implementation.
- Manage project delivery, client communication, technology procurement, and quality assurance.
- Provide troubleshooting, technical documentation, user support, and post-implementation assistance.

EXPERIENCE & EDUCATION

Professional background across software, operations and ICT support

Junior Backend Engineer

Jamii Telecommunications (Faiba) | Nairobi, Kenya | Oct 2025 - Nov 2025

- Supported backend application and SQL database tasks, focusing on data integrity and reliable operations.
- Assisted with troubleshooting, issue investigation, technical documentation, and escalation of system defects.

Graduate Management Trainee - Warehouse Operations

DHL | Kenya | Apr 2023 - Apr 2025

- Tracked and reported operational KPIs using enterprise data, supporting reporting discipline, root-cause analysis, and cross-functional coordination.

Backend Software Intern

National Council for Persons with Disabilities | Turkana, Kenya | 2022 - 2023

- Supported registration databases, data validation, digital records, reporting, and user troubleshooting.
- Assisted with verification and certificate-management workflows while maintaining accuracy, confidentiality, and accessibility.

Digital Literacy Programme Intern

Ministry of Education | Turkana, Kenya | Jun 2021 - Apr 2022

- Installed, configured, maintained, and troubleshoot digital learning devices and ICT equipment in schools.
- Provided first-line support, documented operating procedures, and resolved hardware, software, and connectivity issues.

ICT Technician

Mjanaheri Hospital | Malindi, Kenya | Jan 2021 - May 2021

- Maintained hospital databases, computers, peripherals, and network-related ICT infrastructure.
- Installed, maintained, and repaired equipment; supported users and the secure availability of patient records.

ICT Attachment

Moi University College of Health Sciences | Kenya | May 2018 - Aug 2018

- Supported workstation setup, software installation, equipment maintenance, data entry, and electronic record keeping.
- Assisted with network and end-user support in an institutional ICT environment.

EDUCATION & PROFESSIONAL DEVELOPMENT

BSc Information Technology | Jomo Kenyatta University of Agriculture and Technology | 2015 - 2019

DiscovR R Workshop | Data analysis and reproducible reporting | 2024

Kenya Sign Language | Kenya Institute of Special Education | Training completed

PROJECTS & ADDITIONAL WORK

Selected software projects, research assignments and professional references

SignBridge

A communication platform for Kenya's Deaf community with interpreter requests, a sign dictionary, video-based learning, and county-based community forums.

Laravel | MySQL | Sanctum | Blade | GitHub repository

DawaLine

A public-hospital services prototype covering medicine availability, queues, referrals, and dashboards for patients, hospital staff, management, and government oversight. Uses illustrative data.

PHP | JSON storage | HTML/CSS | JavaScript | GitHub repository

MajiLink

A water-services application and API supporting delivery requests, borehole discovery, and outage reporting for communities in Kenya.

PHP | MySQL | REST API | GitHub repository

Aid Track

PHP/MySQL development covering beneficiary profiles, role-based users, assistance records, and reporting.

PHP | MySQL

Events Management System

PHP/MySQL application work covering bookings, approval workflows, availability checks, and role-based administration.

PHP | MySQL

ADDITIONAL DATA EXPERIENCE

Research Assistant - USAID Nawiri Programme / Mercy Corps | Mar 2023

Market-monitoring data harmonisation and reporting across four sub-counties in Turkana.

Research Assistant - World Food Programme | Feb 2023

Beneficiary registration, database enrolment, and data-accuracy support in Turkana.

LANGUAGES

English: fluent, written and spoken. Kiswahili: working proficiency, written and spoken.
